

Framework Selection Report

Pangasinan Heritage Digital Showcase

Ramos, Rajean Yezza Ann C.

BSIT 4 – BLK 6

I selected the framework React with Next.js 14 (App Router) as my activity in Pangasinan Heritage Digital Showcase because I believe it's the best fit for the project. I compared it with Vue Nuxt.js 3 on performance, ease of development, resources available, component structure and how well each framework fit the project requirements. Next.js 14 got a better score of 34/35 (97.1%). It makes me create a website that loads quickly even on 3G/4G connections, works well on mobile devices and is easier to maintain because it can reuse components like heritage cards, buttons and navigation. Overall, I chose Next.js 14 because it gives the features and flexibility that need to build a fast, responsive, accessible, and user-friendly website to showcase Pangasinan's heritage sites.
